EXPLORATION OF MINERAL RESOURCES**

PODEKS – POVEKS 2018

(Second announcement)

Call for participation and registration of papers

09 ÷ 11 November 2018

Hotel "DRIM" – Struga, R. of Macedonia

Dear Friends

We are pleased to announce XIth expert counseling with international participation in the area of underground and surface exploitation and geological exploration of mineral resources PODEKS – POVEKS 2018 from 09th to 11th November 2018.

Having in mind all the activities in the fields of mining and geology in our country and in the region, that took place after the Xth expert counseling PODEKS – POVEKS 2017, we hope for another successful conference where will be presented new scientific and expert achievements in the area of mining and geology.

COUNSELING GOALS

Main aims of the counseling are presentation of the new technical and technological achievements and presentation of the production results in underground and open pit exploitation of mineral resources and also in the fields of geology, a realistic view in the situation in the underground quarries for lead and zinc and for other mineral resources and also view of the production in the open pit quarries for copper and other metallic and nonmetallic mineral resources, and will be given directions and perspectives for further development of the technologies for underground and surface mining.

Organizing of such expert meetings in the field of mining and geology is a kind of transfer of knowledge and opportunity for exchange of acquired experiences in the process of underground and surface exploitation of mineral resources.

The consultation gives opportunities to all participants, and above all the operational mining and geological engineers, experts and scientists, in the form of expert papers, discussions and acquired experiences from practice, to contribute to conclusions and ideas for further activities for the resolution of certain current problems in the underground and surface exploitation, as well as for further development of the mining and geological activity in the Republic of Macedonia and the region.
